

**SOLAWATER150HP**

**HIGH PRESSURE SOLAR WATER HEATER**

## Product Features

The Solawater150HP are manufactured from polymers via high tech blow molding processes.

- Weather resistant.
- Fixed flat on the roof to minimize storm damage.
- Completely hail resistant.
- Frost resistant.
- Effective and efficient.
- The product will provide hot water 80% of the time without the use of electricity.
- 150 Litre water.
- Corrosion resistant.
- Hard water, such as borehole water, tolerant.
- Collector will not scale up.
- Can be used with any quality water.

## Technical Data

Collector Material	Polyethylene
Inclination Frame	Flat Roof – 12 Degree Roof
Absorption	95%
Working Pressure	100 kPa
Emittance	5%
Stand	Galvanised
Insulation	50mm Polyurethane
Heat Loss	5%
Plumbing Connections	22mm
Collector Aperture	1.8m <sup>2</sup>
Backup element	3Kw
Rated Capacity	150 litre
